

1. We currently listen to K-LOVE over 106.7 in our area. We very much enjoy their programming and do not want to lose it.
2. The proposal to expand Low Power FM (LPFM) could cause us to lose the programming offered to us by K-LOVE. This is due to the priority given to LPFM over FM translator service. The proponents of LPFM would tell you that there is little value to the programming carried on FM translators. This is simply not true in our case.
3. The programming carried by K-LOVE is family friendly and is enjoyed by my family and most of our friends. The loss of this programming would be greatly missed in our area.
